What is the Army DODIC List?

Definition of DODIC

DODIC stands for Department of Defense Identification Code. It is a standardized alphanumeric code assigned to individual items of supply within the U.S. Army and other branches of the Department of Defense (DoD). The primary purpose of the DODIC is to uniquely identify specific items, including spare parts, equipment, tools, and supplies, to streamline logistics operations.

Purpose and Importance

The Army DODIC list serves several vital functions:

1. Facilitates accurate identification of items for procurement, inventory, and distribution.
2. Standardizes item coding across the military branches, ensuring interoperability.
3. Enables efficient tracking of items throughout their lifecycle.
4. Supports maintenance, repair, and replacement activities by providing

precise item data.

5. Helps in cost analysis and inventory forecasting by providing detailed item categorization.

Structure of the DODIC Code

Format and Components

The DODIC is typically a three-character alphanumeric code. Its structure is designed to embed specific information about the item, such as its category and characteristics. For example: - The first character often indicates the material or general type. - The second character may specify the item's purpose or a subcategory. - The third character usually distinguishes between different items within the same category.

Example of DODIC Codes

| DODIC | Description | Usage Example | ||| | AAB | General purpose item, specific code | AAB—Standard issue flashlight | | B12 | Material type and item category | B12—Military-grade batteries | | C34 | Specialized tools or equipment | C34—Field communication device | The specific meaning of each code is maintained within the Army's logistics databases, such as the Army Master Data File (AMDF).

How the DODIC List is Maintained and Used

Development and Updating

The DODIC list is maintained by the Defense Logistics Agency (DLA) and the Army's logistics command. New items are assigned a DODIC after approval,

and existing codes are updated or retired as necessary. Regular updates ensure the list remains current with technological advancements and procurement needs.

Application in Logistics and Supply Chain Management

The DODIC list integrates with various logistics systems such as:

1. Automated Supply Systems
2. Inventory Management Software
3. Maintenance Tracking Systems
4. Procurement Platforms

By referencing the DODIC, logisticians can: - Quickly locate and order the correct item. - Track inventory levels and usage rates. - Manage replacement cycles effectively. - Ensure compatibility of parts and supplies.

Types of DODIC Codes

These are the most common and are assigned to widely used items like tools, clothing, and consumables.

Specialized DODICs

These codes are used for unique or highly technical items such as communication equipment, weapons systems, or specialized vehicles.

Temporary DODICs

Sometimes assigned for experimental or limited-use items, temporary DODICs facilitate testing and evaluation processes.

Examples of Items and Their DODICs

Understanding specific examples helps illustrate the practical uses of the DODIC list.
