Preconceived Notions and Stereotypes

Bias begins with preconceived notions, which are mental shortcuts or stereotypes formed through socialization, personal experiences, or media exposure. These notions influence perceptions and interpretations of new information.

Unreasoned and Automatic

Most biases are unreasoned, meaning they occur automatically without deliberate thought. This automaticity is rooted in cognitive processes designed for efficiency but can lead to errors and unfair judgments.

Reinforcement and Bias Persistence

Once established, biases are reinforced through confirmation bias and social reinforcement, making them difficult to change.

They can perpetuate stereotypes and systemic inequalities.
