According to folklore, the book dates back to antiquity, purportedly authored by a legendary healer—possibly a figure akin to Hippocrates or Paracelsus—who compiled centuries of botanical knowledge into a single manuscript. The earliest mentions of such a book are sparse, but medieval and Renaissance-era texts sometimes allude to secret herbal compendiums passed among select practitioners. Some legends suggest that the book was kept hidden to prevent misuse or suppression by authorities wary of potent natural medicines. Others claim it was lost during societal upheavals, such as wars, invasions, or religious persecutions, leading to its disappearance from recorded history. Over centuries, stories of its existence persisted in oral traditions and obscure manuscripts, fueling intrigue and speculation.
