1. Anchoring

Anchoring is a technique that involves associating a specific stimulus with a particular emotional state. Once established, triggering the stimulus can bring back the desired emotional response.

1. Identify the unwanted behavior or thought
2. Create a vivid mental image of the unwanted pattern
3. Develop a compelling image of the desired behavior or thought
4. Swish the images in your mind—making the positive image larger and more prominent
5. Repeat until the new pattern becomes automatic

The Meta Model is a questioning technique that helps clarify vague language and uncover limiting beliefs, enabling better understanding and problem-solving.

1. Ask specific questions to identify assumptions and distortions in communication
2. Challenge limiting beliefs
3. Reframe negative statements into empowering ones

4. Milton Model

Based on Milton Erickson's hypnotic language patterns, this technique is used for indirect influence and suggestion.

1. Use vague, permissive language to guide the listener
2. Embed suggestions within normal conversation
3. Facilitate subconscious change without resistance

5. Visualization

Visualization involves creating mental images of success to program the subconscious mind for achievement.

1. Define clear goals
2. Relax and vividly imagine achieving the goal
3. Engage all senses for a more immersive experience
4. Repeat regularly to reinforce positive patterns
